# History

## 1275 / Düna burg – castle on the river Düna

According to historical chronicles, Dinaburg castle was founded by Livonian Order Master Ernst von Ratzburg in 1275, on a trade route “from Varangians to Greeks”, which went along the river Daugava and was located close to Russian and Lithuanian land borders. The castle became an important defensive point near which a trading settlement was established.

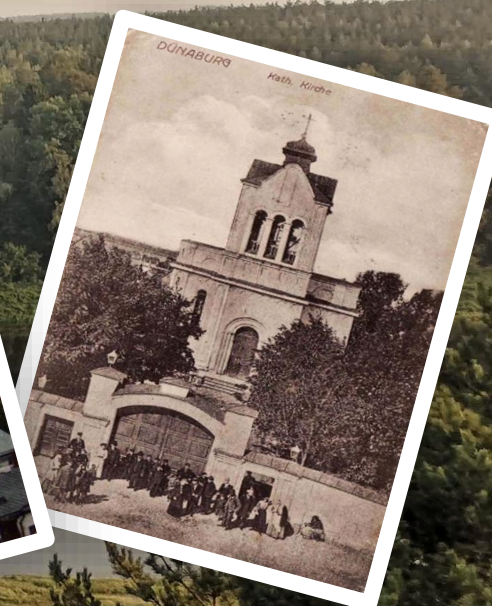

## 1582 / town rights

*Dünaburg was granted town rights by King of Poland Stephen Bathory according to Magdeburger law. It was an important legal act, that declared the existence of legal city near the fortifications. Urban affairs were managed by the magistrate.*

## 1810 / construction of Dinaburg fortress

*The construction of new Dinaburg fortress that began in 1810 due to the threat of Napoleon attack, brought the major changes in the city life. During the 19th-20th centuries Dvinsk became the largest industrial and cultural center in the Northwest area. 112,848 people lived in the city in 1913, it was more than in Minsk.*

# E-governance in Latvia

Electronic Governance is the application of Information and Communication Technologies (ICTs) for delivering government services through integration of various stand-alone systems between Government-to-Citizens (G2C), Government-to-Business (G2B), and Government-to-Government(G2G) services. It is often linked with back office processes and interactions within the entire government framework. Through **e-Governance**, the government services are made available to the citizens in a convenient, efficient, and transparent manner.
